**ROLLER SHUTTERS**

For protection,  
comfort and  
cosiness

A sense of home  
starts at the  
window – with  
ROMA sun screens

# Roller shutters, external venetian blinds and textilscreens from Germany

There may be many places that enjoy more hours of sunshine per year than Burgau in Bavarian-Swabia. Despite this fact, more than 12,000 sunny days of experience with high-quality sun protection systems have been clocked up at the ROMA headquarters precisely in this location.

Our most important insight over these past 35 years: A sense of home starts at the window. Regardless of whether you want to let in the sunshine in the morning or keep prying eyes out in the evening, whether you prefer cool rooms in the scorching summer or save energy

in the cold season – arguably there is no other item in your house that has a greater effect on lighting atmosphere, indoor climate and privacy than sun screening.

ROMA is the leading brand for sun screening systems with the highest requirements in terms of functionality, aesthetics and durability.

Your sun screening specialist will gladly provide you further advice on roller shutters, external venetian blinds and textile screens from ROMA. Your architect can also provide you with information on the multiple design options regarding sun screening.

Roller shutters

# An all-rounder at the window

ROMA roller shutters can do a whole lot more than just the usual up and down.

ROMA roller shutters are intelligent and – if you wish – even fully automated systems that protect against the summer heat, undesirable prying eyes, break-ins, heat loss as well as insects.

They are dynamically controllable design elements for façades and provide effective protection against capricious weather. They change the atmosphere and lighting mood of your rooms ever so slightly or quite dramatically.

ROMA roller shutters are a decision based on reason and gut feeling.

Front-mounted shutters PENTO installed flush with the façade.

Remote control provides more comfort and freedom.

# Privacy at the push of a button

# When homes open and close their eyes

It really is a natural reflex to shut our eyes when there's too much sun or at night when we seek rest.

With a ROMA roller shutter system your house can do the same. Decide for yourself whether the eyes of your home open and close fully automatically according to the position of the sun. Or allow the sun to peer in slightly and quite spontaneously at the push of a button. ROMA roller shutters allow you to adjust the cosiness of your home right from the façade. In all weathers and at all times.

ROMA's new tilting roller shutters offer design and usage possibilities in three dimensions combined with the most modern ease of use.

The benefit provided by roller shutters in terms of climate and light intensity is particularly relevant for large window areas.

roma

ROLLER SHUTTERS  
VENETIAN BLINDS  
TEXTILSCREENS

# Between light and dark there is a plethora of alternatives

Forget for a minute your impressions of earlier types of roller shutters. Modern roller shutter systems have little in common with the rattling monsters except for their basic function.

And this is why there are hardly any further restrictions on how roller shutters can be used. ROMA even offers you thought-out system solutions for oblique windows.

For all those who want to combine the unmatched sun screening of roller shutters with the highest supply of light and air, ROMA has developed a new generation of tilting roller shutters. They offer convenient ventilation options without compromising on sun screening.

Integrated motors allow you to operate them in all directions even with the window closed.

Electric tilting systems optimize the supply of light and air: easily, quickly and conveniently.

TRENDO roller shutter systems by ROMA for oblique windows

A woman is lying on her back, her body illuminated by soft, dappled sunlight. The light creates a pattern of warm, golden spots across her skin, suggesting a window with blinds. The overall mood is peaceful and serene.

A safe sleeping aid  
with no side effects  
whatsoever

# A bodyguard in front of every window

## Burglary protection

Don't invite thieves! Closed roller shutters already provide effective protection against unwanted intruders.

The optional ROMA security package with reinforced bottom laths, guide rails with concealed screws and hold-down system lets you sleep with even more peace of mind.

In combination with a proximity sensor that briefly moves the roller shutter when there is a person present in front of the window, the roller shutters become an essential component of your home security concept.

Security level 1:  
ROMA security package

Security level 2:  
ALUMINO protect  
Extra sturdy slats for more safety

Security level 3:  
No opportunity for unwanted intruders  
Additionally installed GENIO proximity sensor

# Ban annoying pests from your home

## Insect screen

ROMA roller shutters are combined all-rounders. The fully integrated insect screen curtain allows you to keep annoying pests out of your home single handed. If you no longer need it during the day or during the cold season, the tear-resistant and highly transparent Transpatec fabric disappears entirely in the roller shutter box. Many ROMA roller shutters can be fitted with an insect screen – even as a retrofit.

Integrated insect screen in front-mounted shutters PENTO.XP.

# Even more protection for you and your home

## Sun protection

ROMA roller shutters protect residents, furnishings and houseplants against too much sun and UV rays. Roller shutters prevent rooms from overheating due to insolation. This is why a proper sun screen in front of the window also is the most energy-efficient air conditioning system for your home.

## Noise protection

Roller shutters provide additional protection against outside noise that shouldn't be underestimated. The high-quality and environmentally friendly foam-filled profiles with the best soundproofing properties ensure that you sleep very soundly.

## Glare protection

ROMA front-mounted shutters allow integration of additional textile screens as glare guards. They prevent glare, give shade and still allow for a clear view of the outside. This brings additional comfort that you will soon see as indispensable, especially in living areas that are used frequently in the daytime.

## Weather protection

Houses are generally built for generations. In addition to providing comfort, investing in high-quality roller shutters allows you to preserve the value of your real estate. Roller shutters provide effective protection against weathering particularly for the sensitive interface between interior and exterior, i.e. the window.

## Automatic fire protection

SIDEO alarm detection clears the escape routes in case of fire. ROMA's innovation raises the roller shutters as soon as smoke and fire detectors sound an alarm.

By the way: drives keep working thanks to battery backup even in case of power failure.

Reliable protection:  
SIDEO – Alarm detection for customer's smoke detectors

Feeling at home  
can be controlled  
– continuously

# The modern home thinks with you

ROMA makes it extremely easy for you to operate your roller shutters.  
Simply choose the operating concept that best meets your requirements.

The elegant and intuitively operated wall-mounted switches allow you to operate the roller shutters as easily and conveniently as your lighting. A nice side-effect: No roller shutter belts to spoil the visual effect.

The handy ROMA remote control allows you comfortable control of light and shade from anywhere in your home. Raise the roller shutters from your bed in the morning. Or lower all roller shutters from the couch in the evening.

The ROMApad brings you tomorrow's operating concept to your home today. Automate the control of all your sun screening installation according to pre-programmed scenarios. Or move your roller shutters to the desired position just by pointing on the touch screen.

More comfort and security, ROMA's automatic light sensor moves your roller shutters to defined positions according to programmed brightness and temperature values.

Saving energy  
– the best of all  
energy sources

# Saving heating costs with roller shutters

Cost-effective building means keeping home energy consumption to a minimum. Modern roller shutters contribute to this effort.

Because roller shutters – or more precisely the layer of air between window and roller shutter – provide additional thermal insulation during cold months.

Independent studies verify that closed roller shutters alone can considerably reduce heat loss. When renovating houses, simply replacing

the windows and roller shutters allow up to 40% savings in heating energy.

With its energy-saving roller shutters, TERMO, ROMA offers a solution that enables you to quickly and easily renovate outdated roller shutter boxes as regards energy.

There are currently many incentive programmes in Europe as never before. Web sites provide you with individual information for your building.

The layer of air between window and roller shutter acts as thermal insulation and helps save heating costs.

The green areas indicate heat loss from interior to exterior before renovation.

Heat is retained in the home – red shows perfect heat insulation after the roller shutter system has been replaced.

Already beautiful  
in the standard  
version – the ROMA  
Colour Harmony

Those who design their roller shutters using the colours of the ROMA Colour Harmony will most certainly find the perfect colour combination. Match the boxes, guide rails, bottom rails and curtains of your roller shutters tone for tone

and choose from among seven discreet colours. These beautiful, timeless shades of colour are our recommendation for you.

ROMA 9016  
(similar to RAL 9016)

ROMA Grey

ROMA White aluminium  
(similar to RAL 9006)

ROMA Grey aluminium  
(similar to RAL 9007)

ROMA Sarotti

ROMA DB 703

ROMA Anthracite grey  
(similar to RAL 7016)

The ROMA Colour Harmony aesthetically matches all exposed aluminium components of your roller shutters. The seven harmonious colours are available as standard in the three surface finishes Smooth matte, Fine structure matte and Highly weather-proof fine structure matte<sup>1</sup> for boxes, guide rails and bottom rails. You will find an overview of the available curtain colours on page 39.

<sup>1</sup> Highly weather-proof is a special colour, note extra cost.

Colour variations are possible due to printing technology. Please always use original colour samples when deciding.

# 42 colours for every taste – the ROMA Colour Trend

Are you a trendsetter? Then go for the ROMA Colour Trend. You will find the colour you desire for your boxes, guide rails and bottom rails in 42 colour shades and the three surface finishes Smooth matte, Fine structure matte and Highly weatherproof fine structure matte<sup>1</sup>.

Moreover, the surface finishes Smooth matte and Fine structure matte are available as standard in powders from the two leading colour powder manufacturers IGP and Tiger. You will find all the available curtain colours on page 39.

RAL 8001 Ochre brown

RAL 8003 Clay brown

RAL 8007 Fawn brown

RAL 8011 Nut brown

RAL 8014 Sepia brown

RAL 8016 Mahogany brown

RAL 8017 Chocolate brown

RAL 8019 Grey brown

RAL 8022 Black brown

RAL 8028 Terra brown

RAL 9001 Cream

RAL 9003 Signal white

RAL 9005 Jet black

RAL 9010 Pure white

## Unlimited possibilities – the ROMA Colour Variety

The ROMA Colour Variety makes everything even more colourful. With an additional 150 RAL colour hues suitable for façades and 150 additional possibilities for boxes, guide rails and

bottom rails, all desired colours are covered. The two surface finishes Smooth matte and Fine structure matte available with the 150 RAL colours provide the finishing touches.

# Roller shutter on the outside, high-tech on the inside

Roller shutters are exposed to the most extreme weather conditions. Summer heat and frost – the design and material of ROMA roller shutters are of prime importance.

ROMA's ALUMINO series has been specially developed for long-lasting and trouble-free use. Aluminium is naturally corrosion-proof and also entirely recyclable. The foam-filled core considerably reinforces the profiles.

All our aluminium profiles have double walls and are designed for durability. Whether it is ALUMINO, ALUMINO protect or plastic – at ROMA quality always comes first. According to the type of roller shutter and profile, you can choose from among more than 23 attractive colours and design your personal curtain.

**ALUMINO protect**  
The top-class product from ROMA with hard foam-filled core for enhanced protection against outside intruders.

**ALUMINO**  
ROMA's best-selling model with solid insulating foam filling made of polyurethane also ensures high value retention.

**Plastic**  
The cost-effective solution with carefully designed details.

# One curtain, many version – ROMA profile colours

You can also choose from a multitude of colours and possible combinations for curtains: up to 15 standard colours depending on the type of profile\*.

All surfaces on ROMA roller shutters are weather-resistant, light-fast and do not require any subsequent treatment. Basic maintenance and cleaning will suffice.

## Standard colours for roller shutter profiles

			
Light grey	Grey	Anthracite grey	Cream
			
Silver	Beige	ROMA 9016	Ivory
			
Sarotti	Purple red	Pale green	Fir green
			
Moss green	Pastel blue	Steel blue	Grey aluminium
			
DB703	Light wood	Dark wood	Golden Oak
		 A perfect match with element colours in the ROMA Colour Harmony	
Mottled brown	Mottled dark brown		

# The right roller shutters involves detailed work

ROMA has the right roller shutters for every single detail. Front and top-mounted roller shutters can thus be fitted with additional equipment, such as an insect screen, without great effort or considerable expenses – even as a retrofit.

# Quality and ideas produced in Germany

In just three decades, the owner-operated company ROMA has become the German market leader for roller shutters. Moreover, ROMA is continually the focus of attention in the industry thanks to its innovative solutions for external venetian blinds and textilscreens. One of the keys to our success is our clear

commitment to Germany as a production location. ROMA roller shutters, external venetian blinds and textilscreens are produced in four locations throughout Germany. Our persistent collaboration with architects and craftsmen also helps us always remain one step ahead of the sun.

The ROMA headquarters and factory in Burgau

The ROMA factory in Rostock

The ROMA forum in Burgau was established just for this purpose. This is where architects and designers meet, where presentations take place and where we train our trade partners for expert performance in consultation and installation.

The ROMA forum is the meeting point where designers and craftsmen discuss how home will appear in the future. Because a sense of home starts at the window.
